

Community Radiologist opportunity in **Cranbrook, BC**

Photo by Janice Strong

Enjoy an excellent regional hospital practice with ready access to a beautiful mountain playground. World class skiing, biking, fishing, golfing, hiking and more is at your doorstep.

East Kootenay Regional Hospital is the referral center for a large geographic area along the Rocky Mountains. It provides an interesting general practice including all modalities with a variety of non-vascular interventional procedures.

A collegial and friendly small group of five radiologists are looking forward to introducing a new colleague to this amazing region.

Candidates should be FRCPC certified or qualified to sit the Canadian Radiology Fellowship examinations.
